Education

Far Eastern University Institute of Technology — Metro Manila, Philippines
Bachelor of Science in Computer Science with Specialization in Software Engineering — *2023 – Present*

BEPZ Multinational School Inc. — Mariveles, Bataan
STEM Strand, Valedictorian, With Highest Honors — *2021 – 2023*

Experience

Undergraduate Researcher — August 2025 – Present
Far Eastern University Institute of Technology — *Metro Manila, Philippines*

- Co-authored a study of ODIN's research prototype for novice C# array programming and observable coding behaviors.
- The study reported significant pretest-to-posttest gains among 21 participants; its one-group design provides preliminary evidence but does not establish causation.

Capture the Flag Competitor — August 2025 – Present
Billiard Boys / 404 Not Found — *Online/Remote*

- Compete collaboratively in CTF challenges, with a primary focus on web exploitation, cryptography, forensics, steganography, and OSINT.
- Also take on occasional reverse-engineering and binary-exploitation challenges.

Projects

ODIN | *React, TypeScript, Godot, C#, ASP.NET Core, Supabase, PostgreSQL* — August 2025 – Present

- Served as primary frontend and backend developer, building ODIN's React/TypeScript student portal with an embedded Godot Web game and its ASP.NET Core API; integrated Supabase authentication and PostgreSQL persistence.
- Implemented the C# array-submission pipeline, combining Roslyn AST diagnostics, rule-based behavioral classification, Bayesian Knowledge Tracing, and adaptive feedback.

LinguaLoom | *TypeScript, WebExtensions, OpenRouter* — October 2026 – Present

- Developed an open-source browser extension for literary translation of web fiction, with bring-your-own-key OpenRouter support and a local mock provider.
- Configured Chromium and Firefox builds and optional local API-key persistence.

Technical Skills

Languages: C++, Python, Java, C#, TypeScript
Web: React, HTML, CSS
Backend Frameworks: ASP.NET Core, FastAPI, Flask
Databases and Deployment: PostgreSQL, Supabase, Railway
Developer Tools and Environment: Git, VS Code, Docker, Arch Linux
Security Tools: Ghidra, GDB/pwndbg, Wireshark, Binwalk
Security Areas: Binary exploitation, reverse engineering, web exploitation, cryptography, digital forensics, steganography, OSINT
